When we go to Itty Bitty City we check in at the front desk.

Next, we wash and dry our hands. We can use the automatic hand washers or the sink.

Now, we can go to the water table. We can put on a smock to stay to dry when we play in the water.

We can go play in the café next. We can sit at the tables and even get an ice cream cone for Mom!

We can go to the Market. In the market, we can push a shopping cart to choose our groceries. We can use the scanner to scan the groceries too!

We can go to the Animal Hospital. We can feed the animals and take care of them. We can also give them a bath in the sink.

We can play at the train table. We can move the tracks and add more tracks. We can use the crane to load the trains.

When we play in the playology lab, we can visit the playologist to see what fun activities they have planned that day. These are different each time we visit!

When we play in the playology lab we can put on smocks to keep our clothes clean!

We can go to Callen's Pit stop and fuel up our cars. There are tools inside if we need to work on the cars or bicycles.

We can go to the police station. We can put on a police uniform too!

We can go to the fire station, we can ring the bell and try on a fireman uniform.

There is a house fire next door. We have a slide so that we can get out of the house fast!

We can play on the stage. We can dress up with the dress up clothes and play the musical instruments. Sometimes, there is even a story time on the stage.

We can race the cars on the Duplo race track.

We can build with the Blue Blocks in the construction zone!

The school house has desks and a globe. We can pretend that we are at school.

Itty Bitty City is a fun place to play!
